

SecPoint® Cloud Penetrator™

Web Vulnerability Scanning

SECPPOINT®
www.secpoint.com

- ✓ Vulnerabilities: 133,000+
- ✓ Web Shells: 1,400+
- ✓ Cloud Scanning (SaaS)
- ✓ No Software Required
- ✓ RBL Lists Checks 70+
- ✓ Scanning Profiles 30
- ✓ Attack Technology SQLi, Blind SQLi
- ✓ Reflected XSS
- ✓ Remote Code Execution
- ✓ Data Leak Detection
- ✓ TLS & SSL Vulnerabilities
- ✓ Scan IoT Devices
- ✓ Scan SCADA Systems
- ✓ AI Machine Learning
- ✓ Professional Reporting PDF & HTML
- ✓ Detailed Remediation
- ✓ Mitre CVE / Ubuntu USN / Microsoft / OSVDB
- ✓ Scheduled Scanning
- ✓ Prevent Hackers from accessing your server
- ✓ Launch Real Exploits and Denial of Service Attacks
- ✓ Scan any OS or Device
- ✓ Daily Database Updates
- ✓ User Friendly Interface

PREVENT HACKERS FROM INFILTRATING YOUR SERVERS AND NETWORK

Identify & resolve vulnerabilities before they are exploited

Ransomware & black hat hacker groups target organizations regardless of business type. Their objective is to penetrate defences, steal sensitive data, and use it for extortion attempts or to disrupt the organization's operations.

Cloud Vulnerability Scanner

The SecPoint® Cloud Penetrator™ is a web vulnerability scanner. It can be used to scan your public IP addresses for vulnerabilities.

This can include firewalls, websites, e-commerce platforms, IoT devices, SCADA systems, mail servers, SQL databases, or any other entity with a public IP address.

Over 133,000+ Vulnerabilities

SecPoint's Cloud Penetrator™ boasts a vulnerability database that's the product of over 25 years of continuous research..

The Penetrator's database contains more than 133,000 unique remote vulnerabilities to test against.

This database is updated several times a day.

Professional Reporting

The SecPoint® Cloud Penetrator™ offers comprehensive professional reports based on requirements, available in both PDF and HTML formats.

These reports provide detailed vulnerability descriptions, Proof of Concept (POC), and solutions to address the vulnerabilities.

Automatic Scheduled Scanning

With the SecPoint® Cloud Penetrator™, you can effortlessly configure automatic scans for your IP addresses. Choose from daily, weekly, monthly schedules, or set a specific date.

Vulnerability Scanning for All Operating Systems and Network Devices

The Cloud Penetrator is equipped to scan any operating system or network device. Scanning every device in your network setup is crucial to identify and address vulnerabilities before they can be exploited by attackers.

Multi-User Support ensuring Privacy

The SecPoint® Cloud Penetrator™ supports multi-user login. This feature allows for the creation of distinct accounts with varied scanning targets. It can also be repurposed and resold as a Software-as-a-Service (SaaS) to your own clientele.

Benefits of the SecPoint® Cloud Penetrator™:

√ Identify vulnerabilities in your online network system	√ Solutions provided to remediate identified vulnerabilities.
√ Ensuring a secure design for all applications and systems.	√ Data encryption to ensure confidentiality.
√ Systems designed without the need for remote interaction.	√ Automated vulnerability scanning for proactive detection.
√ Vulnerability scanning paired with penetration testing.	√ Application security vulnerability assessment.
√ Detailed and professional reporting in both PDF & HTML formats.	√ Comprehensive solutions to address detected vulnerabilities.
√ User-friendly web interface for easy navigation and usage.	√ Denial of Service (DoS) tests to ensure system resilience.
√ Enhanced application security measures.	√ SaaS (Software as a Service) protection measures.
√ Web Application Scanning (WAS) for potential threats.	√ Testing against Blind SQL Injection attacks.
√ Detection and mitigation of XSS (Cross-Site Scripting) vulnerabilities.	√ Measures against Remote Code Execution.

Features

Vulnerability Scanner Features

- √ Vulnerability Scanning & Assessment
- √ Database of 133,000+ Vulnerabilities
- √ Database of 1,400+ Web Shells
- √ No software installation required
- √ Advanced scan options available
- √ Capability to launch Real Exploits
- √ File Upload Vulnerability Checks
- √ Compatible with scanning any OS
- √ Automatic web crawling scripts
- √ OS independent interface
- √ SANS top 20 vulnerability checks
- √ Malware Detection capabilities
- √ Lethal attack detections (SQLi) & Blind SQLii
- √ Identification of missing security headers

Easy-to-understand Reporting

- √ Multiple report formats XML PDF & HTML reports

Vulnerability Scan Configuration

- √ Virtual host scanning capability
- √ Option to scan specific ports
- √ Ability to scan designated web directories
- √ Email notification upon scan completion
- √ 30 Scanning Profiles Available

Security Scanning of

- √ CMS Vulnerabilities
- √ Specific platforms:
Wordpress, Drupal, Magento, Shopify,
Umbraco, Joomla, Webshops

Detection of Web Vulnerabilities & Errors

- √ Automatic web crawling engine identifies both known & unknown files on websites
- √ Detects Cross Site Scripting (XSS)
- √ Identifies Reflected Cross Site Scripting
- √ Discovers SQL Injection vulnerabilities
- √ Locates Web Errors
- √ Comprehensive TLS & SSL checks
- √ Remote Code Execution (RCE)

Multi User Support

- √ Simultaneous login for multiple users
- √ Individual accounts with tailored scan options and IP ranges
- √ Specific security levels for each user
- √ Distinct roles: Admin and regular users

Scheduled Vulnerability Scanning

- √ Automated scheduling for regular scans
- √ Alerts for newly identified security vulnerabilities
- √ Compares new vulnerabilities with previous records, highlighting improvements in security

Scalable and Upgradeable

- √ Convenient IP license upgrades
- √ Ensures protection of your investment

Penetration Testing

- √ Capability to launch Denial of Service (DoS) attacks
- √ Ability to execute overflow attacks

Automatic Update

- √ Daily automatic database updates
- √ Firmware updates delivered automatically, introducing new features & functionalities
- √ Centralized update point for streamlined management
- √ Alerts provided when the database reaches its expiration
- √ Option to manually upload updates through the interface

Support & Maintenance

- √ Comprehensive support included with the subscription
- √ Secure web-based user interface (https)
- √ Quick and intuitive setup wizard
- √ Easy configuration backup and restore options
- √ Alerts through email and logging capabilities
- √ Built-in diagnostic functions for troubleshooting
- √ Full support included in price

Security Profile Scanning

- √ 30 Profiles - Best Scan, Lethal HTTPS Web Attack Scan, SSL & CMS Web Scan, Wordpress Web Scan, Quick Scan, Full Scan, Firewall Scan, Aggressive Scan, OWASP 10, PCI-DSS Preparation for Web Applications, HIPAA Policy Scan, SCADA ICS PLC IoT, CWE 2011, ISO 27001, NIST 800-53/FISMA, CIS Controls v8.0, GLBA Integrity, SSL Security Checks, VoIP Devices.

Value Added Reseller (VAR) / Value Added Distributor (VAD)
