**Net Protector**
Z SECURITY SERVER

Z Security for Server

The ultimate solution to secure your servers with powerful multi-layered protection and robust features designed for seamless operation across businesses, industries, and organizations.
Core Benefits

↗ **Multi-Layered Security**
Tailored for enterprise grade server protection.

↗ **Low Resource Consumption**
Ensures peak performance with minimal CPU & memory usage.

↗ **Data Safety Assurance**
Full protection for critical business data.

↗ **Optimized for Server Environments**
Designed for reliability in high-performance server setups.

↗ **Premium Support**
Dedicated and prioritized technical assistance.

Key Features

Advanced Threat Protection
Comprehensive defense against viruses, ransomware, and advanced malware targeting servers.
Cloud-Integrated Backup
Provides **10GB of secure cloud storage** to safeguard critical data.
Real-Time Scanning
Monitors files and processes for malicious behavior, ensuring zero downtime.

Access Control
Restrict unauthorized access to sensitive files and applications.

Web Protection
Protects servers from phishing, malicious sites, and unverified downloads.

Secure your servers and protect your business
with Net Protector Z Security Server

Threat Prevention

Antivirus & Anti-Malware
Active protection against viruses and malware.

Ransomware Shield
Blocks new, unknown ransomware and prevents data encryption.

Application Control
Prevents unauthorized applications from running on the server.

Email Protection
Scans incoming emails to prevent threats from reaching the system.

Data Leak Prevention
Stops unauthorized sharing of confidential data.

Network Security
Protects against malicious activities and unauthorized network access.

Backup & Data Recovery

Cloud Backup
Automated cloud-based backup to ensure data availability during disasters

LAN Backup
Simplified backup solutions for local network environments.

Accounting Data Protection
Specialized features to secure critical accounting data.

Performance Optimization

Disk Optimization
Removes junk and temporary files to free up server space.

System Monitoring
Advanced tools to monitor server performance and kill unwanted processes.

Self-Defense Mechanism
Ensures Z-Security files are tamper-proof.

Web Security

Firewall
Monitors and blocks malicious incoming and outgoing connections.

Anti-Phishing
Blocks fraudulent and look-alike web pages to protect credentials.

Secure Browsing
Safeguards server administrators while accessing management tools online.

Web Control
Remotely allow or block websites based on categories or schedules.

Privacy

File Shredder
Permanently deletes sensitive files.

Anti-Keylogger
Blocks attempts to record keystrokes and intercept sensitive inputs.

Webcam & Microphone Protection
Prevents unauthorized access to hardware components.

Two-Factor Authentication
Adds an extra layer of security for server access.

System Requirements

Operating System (32-bit & 64-bit)
Windows Server 2025 / 2022 / 2019 / 2016 / 2012 / 2008

CPU	RAM
1 GHz or higher	~ 1 GB

Disk Space	Browser
~ 5 GB or more	Latest versions of Chrome, Firefox, or Internet Explorer

Additional Requirements
Active internet connection for updates and cloud backup
